

Summary

Results-oriented Senior .NET Engineer with extensive experience since 2015 in developing and maintaining high-performance applications. Seeking to leverage expertise in .NET, C#, and Azure DevOps to contribute to innovative development teams. Skilled in .Net, .Net Core, Rest APIs, React, Redux, Docker, and Git. Embracing the Scrum methodology, I've collaborated with numerous companies to deliver successful projects. Continuously expanding my horizons. I strive to create innovative solutions while furthering my proficiency in both software development and language skills.

Experience

Senior Backend .NET Engineer Andersen Lab (working with Accelleron)

- Contributed to developing a Vessel Performance Monitoring API using .NET 6 to enhance fuel efficiency and operational insights, aligning with Accelleron's goals to optimize engine performance and reduce costs.
- Utilized .NET, Azure DevOps, Bicep, Docker, REST APIs, and React, deploying intranet solutions as Docker containers for streamlined evaluations.
- Played a key role in migrating applications from .NET 6 to .NET 8 and creating Bicep templates to optimize infrastructure deployment and maintainability.

Senior Software Engineer Team Lead ICterra

- Led a team in the development and deployment of three project management applications using .NET Core and ReactJS at Aselsan, successfully completing all three within a year. These projects optimized workflow efficiency and enhanced team collaboration across departments. Spearheaded Agile/Scrum practices, managing 2-week sprints to ensure timely delivery.

Software Developer Ante Grup Bilişim

Havelsan (Outsource)

- Contributed to a successful migration of a GIS project to Java 8 by writing unit tests and resolving SonarQube issues, enhancing system stability and maintainability. Additionally, worked on a GIS-focused web application.

The Court of Accounts (Outsource)

- Developed and maintained a staff management system, improving workflow efficiency for 1,000+ employees. Utilized .NET MVC 5, MSSQL, PostgreSQL, JavaScript, and jQuery to enhance data management and user accessibility.

The Ministry of Environment and Urban Planning. (Outsource)

- Development of the transformation of the areas at risk of a disaster system at the Ministry of Environment and Urban Planning with .Net MVC, MSSql Db, and Javascript

Education

Middle East Technical University, MSc.

Software Engineering, GPA: 3.30 / 4.00

Data Structures and Algorithms, Web Engineering, Object Oriented Programming and Systems (OOPSL), Design Patterns, and Db Management were some of the courses that I enrolled.

Sep 2010
Jun 2014

Cankaya University, BSc.

Electronic and Communication Engineering

Java and Microprocessor were the Software courses in my curriculum.

Certificates

Sep 2016

C# .Net Programming, MsSql

Jul 2016

Web Design, ASP.NET Web Application Development (MVC .NET Core)

May 2016

C# .Net Programming, MsSql
